one year

14. Estimated time required to complete the application of water to beneficial use.....

15. Remarks: For use other than irrigation or stock watering, state number and type of units to be served or annual consumptive use:

An additional 10 MGA is needed at this well on a temporary basis to remove water from the high wall in order to insure stability and safety when mining resumes in this area next year. At that time the well will be drilled out and there will no longer be a need for a well here, therefore we request only a temporary permit. We need the additional 10 MGA beacuse we only have about 3 million left on our previous permit and we still have water in the highwall which is causing stability problems. Also see existing map under certificate #48996.

APPROVAL  
.....OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This temporary permit to change the point of diversion, manner of use and place of use of a portion of the waters of an underground source as heretofore granted under Permit 57097 is issued subject to the terms and conditions imposed in said Permit 57097 and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This temporary permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The total combined duty of water under Permit 48997, Certificate 13237; Permit 48998, Certificate 13238; Permit 48999, Certificate 13239; Permit 49931, Certificate 13240; Permit 53342, Certificate 13245; Permits 57096, 57097, 57098, 60314-T, 60324-T, 60325-T, 60326-T, 60327-T, 60328-T, 60329-T and 61204-T shall not exceed 268.0 million gallons annually.

(CONTINUED ON PAGE 2)

The amount of water to be changed shall be limited to the amount which can be applied to beneficial use, and not to exceed.....0.05.....cubic feet per second but not to exceed 11.8 million gallons annually.

Work must be prosecuted with reasonable diligence and be completed on or before.....

Proof of completion of work shall be filed before.....

Application of water to beneficial use shall be made on or before.....

Proof of the application of water to beneficial use shall be filed on or before.....

(PERMIT TERMS CONTINUED)

This permit is issued under the preferred use provisions of NRS Chapter 534. The manner of use of water under this permit is by nature of its activity a temporary use and any application to change the manner of use granted under this permit will be subject to additional determination and evaluation with respect to the permanent effects on existing rights and the resource within the ground water basin.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

Monthly records shall be kept of the amount of water pumped from this well and the records submitted to the State Engineer on a quarterly basis within 15 days after the end of each calendar quarter.

This temporary permit is issued pursuant to the provisions of NRS 533.345 Section 2 and will expire on September 22, 1996 at which time all rights herein granted shall revert to the right being changed by this temporary permit.
